

Women's Health

30 January - 1 February 2017

Introduction

The department of Epidemiology, in collaboration with the departments of Internal Medicine, Cardiology, and Obstetrics and Gynecology at Erasmus University medical Center, offers medical and health professionals a comprehensive course in Women's Health.

This course brings together experts in women's health from a multitude of disciplines and provides participants with resources that will assist them in broadening and strengthening clinical care and research programs that are aimed at improving women's health and wellbeing. The course will focus on the critical issues impacting women's health through the life cycle.

Our main purpose is to provide participants interested in improving women's health and wellbeing with essential knowledge and principle skills from several disciplines.

At the end of the course, participants will have developed:

- An understanding of the multiple determinants of women's health
- An ability to identify the critical issues in women's health through the life cycle
- Perspectives on advancing women's health in primary and secondary health care settings.

This year's course specifically highlights the "Gender Gap in Health Care and Medical Research".

We look forward to welcoming you in Rotterdam in January 2017.

Kind regards,

Dr. Maryam Kavousi
Course Director, Epidemiologist
Dr. Jeanine Roeters van Lennep
Course Director, Internist
Dr. Hans Duvekot
Gynecologist

Professor Eric Boersma
Professor of Clinical Epidemiology
Professor Oscar Franco
Professor of Preventive Medicine

Accreditation

We have applied for accreditation from the following associations:

- Nederlands Huisartsen Genootschap (NHG)
- Nederlandse Vereniging voor Obstetrie en Gynaecologie (NVOG)
- Nederlandse Internisten Vereniging (NIV)
- Nederlandse Vereniging voor Cardiologie (NVVC)

The Women's Health course is endorsed by the European Association of Preventive Cardiology (EAPC) and the European Menopause and Andropause Society (EMAS).
